EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
M.Tech - Computer Science	Indian Institute of Technology (BHU) Varanasi	8.68 (Current)	2025 - Present
B.Tech - Computer Science	Indian Institute of Information Technology Pune	7.29 CGPA	2020 - 2024
Senior Secondary	CBSE Board	93.0%	2019
Secondary	CBSE Board	10.0 CGPA	2017

EXPERIENCE

- Wipro Limited** June 2026 - July 2026
Native AI Intern Noida
 - Developed an end-to-end **query classification pipeline** for unlabelled customer letters using **Qwen3-0.6B embeddings** and clustering techniques including **HDBSCAN, Agglomerative, and IDEC** to discover meaningful query categories.
 - Applied **c-TF-IDF** and **KeyNMF** for topic assignment and pseudo-labelling, creating a labelled dataset for **supervised classification** and an inference pipeline returning **Top-3 query categories** with confidence scores.
 - Built an **AWS Nova LLM-based information extraction pipeline** with query-specific **JSON schemas**, dynamically selecting the relevant schema based on the predicted class to convert unstructured letters into structured JSON.
 - Integrated the classification and extraction stages into an **end-to-end NLP/LLM workflow**, enabling automated **query categorization and structured information extraction** from customer correspondence.

PROJECTS

- Stroke Prediction** August 2025 - November 2025
Group Project GitHub
 - Developed an integrated stroke prediction framework combining data preprocessing, association rule mining, outlier detection, and Random Forest classification to analyze medical and lifestyle risk factors.
 - Identified key frequent patterns and anomalous patient profiles using Apriori-based pattern mining and Local Outlier Factor (LOF), enhancing interpretability and uncovering hidden clinical insights.
 - Achieved effective stroke risk prediction by handling class imbalance with SMOTE and optimizing a Random Forest model, resulting in improved recall for high-risk stroke cases and robust decision support for healthcare applications.
- Divide Xpert** July 2023 - August 2023
Individual Project GitHub | Website Link
 - Developed a full-stack expense-sharing application with CRUD features for group creation, user management, and simplified bill settlement.
 - Built a secure and responsive interface using React, Bootstrap, and JWT-based authentication, supported by a Node.js + Express.js backend for efficient API handling.
 - Designed a MongoDB NoSQL database for managing user and group data, and applied a Priority Queue algorithm to optimize expense graphs and reduce final transactions.
- Message Spam Detector** December 2022
Machine Learning Lab Project GitHub
 - Developed a Python-based spam detector using data preprocessing, label encoding, Porter stemming, and TF-IDF vectorization.
 - Utilized the Multinomial Naive Bayes algorithm for spam classification, achieving over 95% accuracy in identifying spam messages.

TECHNICAL SKILLS

- Programming Languages:** C++, Python, JavaScript
- Data Science:** Pandas, NumPy
- Web Technologies:** NodeJS, ExpressJS, MongoDB
- Developer Tools:** Git, VS Code, Linux

ACHIEVEMENTS

- DSA:** Solved over 500 data structures and algorithms problems on LeetCode. [LeetCode Profile Link](#)
- JEE Mains 2020:** Secured 98.17 percentile in JEE Mains 2020 among 1 million candidates.
- GATE 2025:** Achieved 99.77 percentile in GATE (CS) 2025 among 170,000 candidates.
- Chess:** Earned an official FIDE rating in December 2016 by participating in a tournament organized by the Chandigarh Chess Association.

KEY COURSES TAKEN

- Computer Science:** Algorithms and Data Structures, Operating Systems, Database Management System, Machine Learning, Artificial Intelligence
- Mathematics:** Linear Algebra, Probability Theory and Random Processes, Discrete Mathematics
